

COLLECTION

**MIA**

A romantic inspiration

MIA collection is a proposal of subtle, classic furniture for children of different age. The calm and delicate colors allow for large tonal freedom in arranging interiors. The spacious furniture pieces of MIA collection come with lower drawers that are easily accessible to small children.

## Desk in several versions

Thanks to functional solutions, such as the desktop module, the furniture is excellent for a small child's, as well as a student's room. The desk may be complemented with an escritoire with abundance of lockers, or with a charming dressing table with mirror.
